EXPERIMENT

Title

MAGIĆ STRING

Description

Eva has a string S containing lowercase English letters. She wants to transform this string into a Magic String, where all the characters in the string are the same. To do so, she can replace any letter in the string with another letter present in that string.

Your task is to help Eva find and return an integer value, representing the minimum number of steps required to form a Magic String. Return 0, if S is already a Magic String.

Input Specification:

input1: A string S, containing lowercase English letters.

COZ

Output Specification:

Return an integer value, representing the minimum number of steps required to form a Magic String. Return 0, if S is already a Magic String.

Sample Input:

aaabbbccdddd

Sample Output:

8

Source Code: <

```
s=input()
 n=len(s)
   d=\{\}
mx=0
   for i in s:
                                                      if i in d:
                                                                                                      d[i]+=1
                                                   else:
                                                                                                      d[i]=1
                                                   if d[i]>mx:
                                                                                                      mx=d[i]
 print(n-mx)
                                                                                                                                        3822
                                                                                                                                                                                                                                       38R23ECO21 3R22ECO21 3R2ECO21 3R22ECO21 3R22ECO21 3R22ECO21 3R22ECO21 3R22ECO21 3R22ECO
